

Error Messages – Browser examples of messages where a certificate issue is detected

Safari encountering a certificate trust chain issue:

	Safari can't verify the identity of the website "s3.hellopages.com". The certificate for this website is invalid. You might be connecting to a website that is pretending to be "s3.hellopages.com", which could put your confidential information at risk. Would you like to connect to the website anyway?

	The site's security certificate is not trusted!		
	You attempted to reach www.kia.com, but the		
	server presented a certificate issued by an entity		
	that is not trusted by your computer's operating		
	system. This may mean that the server has		
	generated its own security credentials, which Google Chrome cannot rely on for identity		
	information, or an attacker may be trying to		
	intercept your communications. You should not		
	proceed, especially if you have never seen this		
	warning before for this site.		
	Proceed anyway Back to safety

Untrusted Connection	-
This Connection is Untrusted	
You have asked Firefox to connect securely to isc.sans.org , but we can't confirm that your connection is secure.	
Normally, when you try to connect securely, sites will present trusted identification to prove that you are going to the right place. However, this site's identity can't be verified.	
What Should I Do?	
If you usually connect to this site without problems, this error could mean that someone is trying to impersonate the site, and you shouldn't continue.
