

Create seamless payment experiences for your customers that are fast, secure and versatile

ANZ eGATE

ANZ eGate provides a versatile online payment solution that allows your customers to pay how they want. Pay using a range of debit/credit cards, mobile wallets, giving customers the freedom to checkout quickly and securely, while aiding conversion rates and repeat purchases.

Surcharging

Surcharging gives you the ability to pass on your cost of acceptance to your customers for your growing ecommerce business. You can choose how you would like to set up your surcharging rules within the portal so that it can be applied to every transaction.

EMV 3DS

Avoid chargeback and liability for fraudulent transactions authenticated using EMV 3DS. EMV 3DS is a fraud prevention solution that enables risk based authentication without adding unnecessary friction to the checkout process. ANZ eGate supports Visa Secure, AMEX Safekey, Mastercard Identity & J/Secure.

ANZ eGate Merchant Portal

Manage your payments better via an easy-to-use dashboard for monitoring reports and refunds, or to analyse daily takings. Manage your risk of fraud with easy to add transaction filtering rules.

Lower PCI costs

With hosted pages provided by Mastercard®, there's no need to store customer card details, allowing businesses to reduce PCI compliance costs.

Network tokenisation

Network tokenisation secures your customers information with the payment network so you never have to store sensitive credit card information on your payment gateway. Enable over the air updates to card tokens so your customer data is kept up to date and reduce declines due to outdated credentials.

Recurring payments & repeat purchases

Enable card-on-file storage to make it easier for return customers or when using recurring billing without having to store the customer's card details.

Accept Digital Wallets

Flexibility that customers expect, allowing them to pay the way they want, simply and securely.

SUITABLE FOR

eCommerce - Selling online

- Cart plugins – Integrate with Magento 2, Opencart, WooCommerce, SAP Hybris and PrestaShop.
- Ways to Pay – Flexibility that customers expect, allowing them to pay the way they want, simply and securely – using a range of debit/credit cards, mobile wallets (Apple Pay and Google Pay) and alternative payment options. Hone in on consumer preferences by offering services including subscriptions, recurring billing and more, to make keeping on top of payments easy for you and your customers.
- Design it your way – With online security concerns at an all-time high, build credibility and trust in the checkout experience through mobile optimised hosted payment pages. These are integrated and offer customisable checkout experiences to suit your UX, brand design, mobile app, mobile responsive and CSS customisation to lead to more sales conversions.

Backoffice payments administration

- Upload Batch Transactions – A function which allows you to process bulk transactions all at once.
- Admin Portal – Raise orders, manual subscriptions and refunds through the Merchant administration portal.
- Reporting – Prepare daily, weekly, monthly or annual Merchant reports, search transaction & settlement records.

Extend ANZ eGate with third party add-ons

Utilise third party add-ons to extend the capability of ANZ eGate for your business:

- Subscriptions – Charge a customer using a predefined schedule, e.g. a recurring payment for a magazine subscription or gym membership.
- Installment plans – Customers pay for a single purchase in several installments, similar to buy now pay later services.

eCOMMERCE INTEGRATION

Hosted checkout pages

Collect payment details from customers through an interaction hosted and displayed by ANZ eGate.

- ✓ Embedded into existing website
- ✓ Hosted page – hosted and displayed by ANZ eGate
