

Secure payment choice for customers

ANZ SECURE GATEWAY

ANZ Secure Gateway provides customers with a safe solution for payments online, in-app and over the phone. All sensitive data is securely converted to tokens and stored allowing for single-click payments, auto-debits and more.

Payment convenience

Mobile optimised transaction pages and options for Apple Pay™ and Google Pay™ make mobile payments easy for your customers.

Gateway Tokenisation

Prevent card fraud and secure your customers card information on file by replacing them with secure tokens on your payment gateway to minimise the sensitive credit card information on file and reduce your business exposure from cyber security events.

Recurring payments

Give customers the power to stay in control of their payments through scheduled and recurring payments, while the ability to create customer profiles, makes payment navigation easy.

Admin made easy

ANZ Secure Gateway does the heavy lifting with payments so you don't have to. It ensures that all billing and payment records, plus convenient email receipts for your customers, are handled quickly and efficiently giving customers a better experience of your business.

Suitable if you:

- Want to accept payments securely over the phone, online or both
- Process batch & scheduled payments
- Recurring & subscription payments
- Prefer Gateway Tokenisation
- Want in app payments.

CHOOSE THE PACKAGE THAT'S BEST FOR YOU:

Phone package

The right option if:

- You want to take customer orders over the phone and process payments securely via an online portal
- You want to set up regular payments and process batch transactions
- You have a website but don't want to accept payments online.

Phone + Web package

Everything in the phone package plus more! Consider this option if you don't want to store credit card data, you want to accept payments via your website and you want a customised and secure payment page.

- Easy integration options with Apple Pay™ and Google Pay™ to enable one-touch payments in app
- Gateway tokenisation
- Flexible options for website integration and mobile-optimised pages
- Level 1 PCI DSS compliant gateway
- EMV3DS - Visa Secure (formerly known as Verified by Visa) & Mastercard® Secure Code™/Mastercard Identity Check provide an extra layer of fraud prevention

Accepting Apple Pay™ and Google Pay™

Taking payments online? Integrate mobile wallets into your payment options, offering your customers instant convenience, security and efficiency.

Google Pay™

Let your customers make simple and secure purchases of physical goods and services in Android apps, without the need to manually enter payment and shipping information. Customers can speed through checkout in apps when they select 'Buy with Google Pay'.

Apple Pay™

Provide customers with an easy and secure way to pay using Touch ID or passcode in iOS apps and on the web (Safari websites only), without having to enter payment, billing and contact details. Enhance your customer payment experience and improve your checkout conversion rates by accepting Apple Pay in your iOS app or website.
