

# Let your customers pay in their home currency.

## Dynamic Currency Conversion (DCC)

With DCC, your international cardholders can see how much they'll be spending in their home currency.

## Advantages for you and your customers

Price clarity for international Visa and MasterCard cardholders

Over 40 different currencies accepted

No additional processing costs for merchants

## How it works<sup>2</sup>

**1. Your customer** taps<sup>3</sup>, inserts or swipes their card to pay for their purchase.

**2. Your terminal** automatically detects an international Mastercard or Visa card.

**3. Your terminal** confirms if the currency is one of 40+ eligible for DCC.

**6. Your transaction** is completed and you will receive this transaction in AUD.

**5. Your customer** chooses whether they wish to pay in their home currency.

**4. Your terminal** displays the total amount in AUD and the cardholder's home currency.

### What your customer will see

Your customer can check the terminal screen to see the transaction amount in local currency as well as their home currency, inclusive of exchange rate and exchange rate markup.

### Up to date exchange rates

Exchange rates are updated daily<sup>4</sup> and displayed on the terminal screen and on the receipt for the customer.
